

Customer Name : Company Lockers Pvt. Ltd.

Project : LockedMe.Com

Welcome to LockedMe.com

Developed By : Anil Singh Rawat

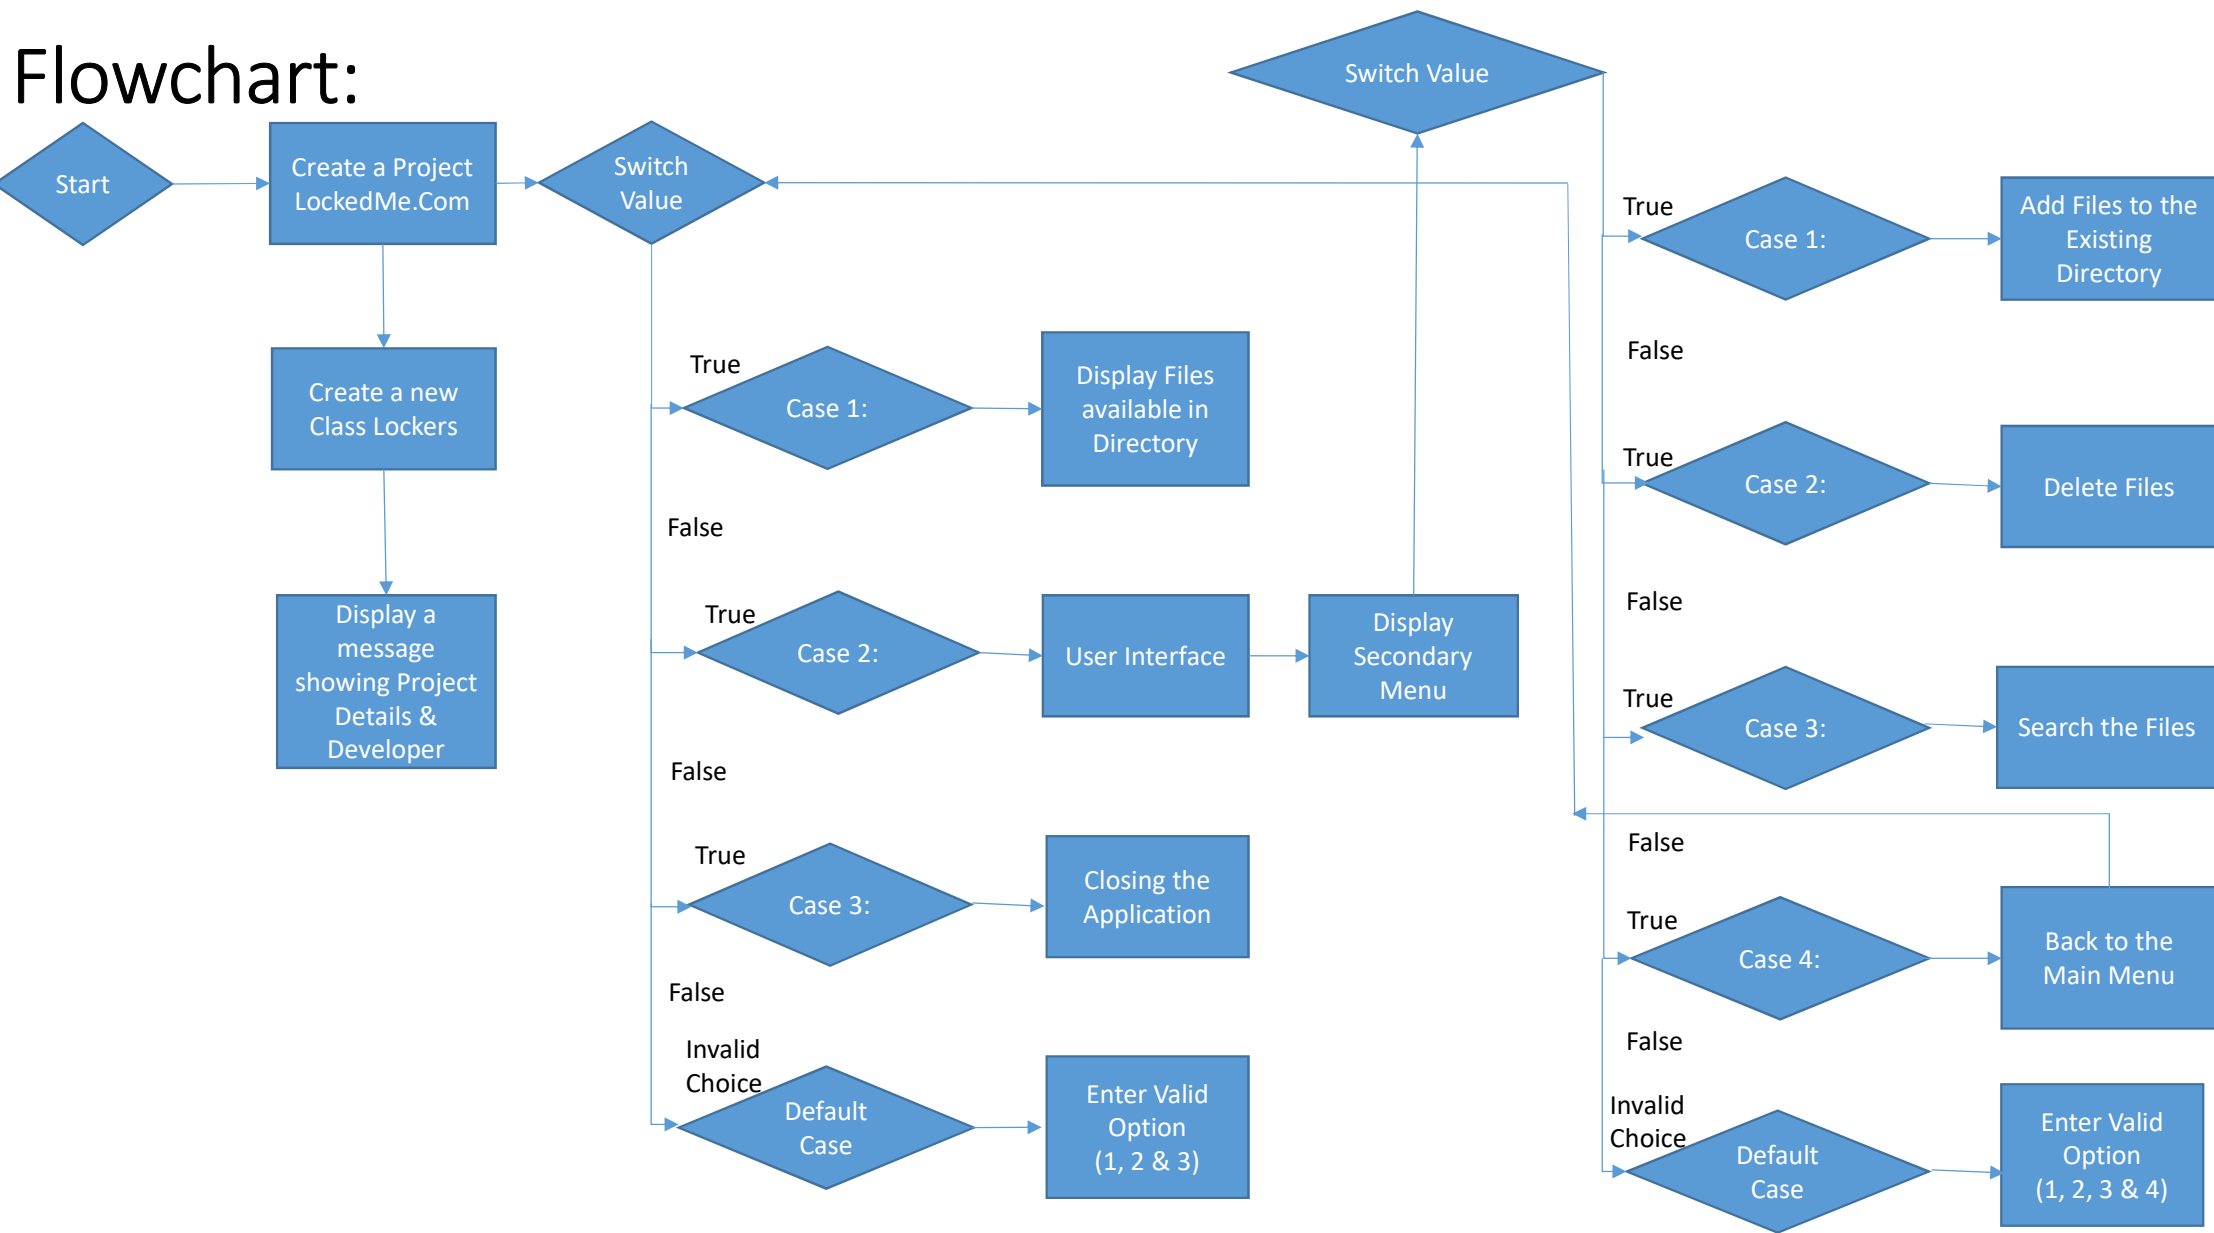

# Sprint Planning

- Our aim is to digitize the products of M/s Company Lockers Pvt. Ltd.
- Our Sprint is Divided into following parts:-
  - Understanding what need to be executed (Time Required: 1-2Days)
  - Assigning the work to development team (Time Required : 1 Day)
  - Develop the prototype of LockersMe.com (Time Required : 4Days)
- Total Time Required : 7Days

# Algorithms:-

- Start
- Main method
- Printing application name & developer details.
- User Input (1, 2 & 3) for displaying files in directory, edit User Interface & Closing the Application. Also showing message when user enters a invalid option.
- If user enters option 2, it is further divided into 4 parts.
  1. Add a file
  2. Delete a file
  3. Search a file
  4. Back to the Main Menu.Also showing message when user enters a invalid option.
- End

# Flowchart:

### Conclusion:

I hereby conclude the project (LockedMe.com). We have used nested switch statement, if conditions & file handling for rigorous program.

### Suggestions:-

- After displaying the files, We need to navigate the program back to the main menu. So that users can add, delete or search the files.
- In addition to add, delete or search the files, we need to implement one modify function also to modify the files.
